Maintain the Rankings

Search Engine Rankings

We identify region, your business area and customers to help you increase your business. We submit your website to all the relevant directories and sites. With right SEO activity we increase your business and rankings.

We do Google SEO for you as well which is one of most popular search engine.

Ranking Reports

We monitor the results for your website after submitting them to appropriate directories and websites. It is very important to analyze the results of these submissions to get rankings in search engines. It takes 60-90 days to get rankings for the sites after submissions. It may take longer depending on the competition in your business area. We regularly send you ranking

reports for selected keywords so that you can track your website.

Maintain the Rankings

Our team regularly maintain and keep track of your rankings. The Search Engines are regularly changing their algorithms and we make changes to maintain your rankings. In case your website slips down due to these changes and high competition, we get your rankings up again in some time.
